designed for life

## Innovative design

### •user friendly

- attractive and user friendly design
- portable - with integrated handles
- lightweight
- easy to operate
- climbs from room to room
- ergonomic and intuitive hand control
- easy to charge through hand control
- light and sound signal indicate when charging is necessary
- light indicator tells when it is time for service
- same slings as the other Molift lifters
- same flexible rail system as Molift Hi-Trac

### •extra patient comfort

- unique design gives extra room for the head
- 4-point suspension integrated in the lifting motor
- 4 point suspension together with the Molift sling enables comfortable, correct positioning from lying to sitting or vice versa as the sling loops glide into a natural position during the lifting process.
- soft start and stop for comfortable lifts.

Equipped with safety devices to prevent damage to personnel and equipment in case of incorrect use:

- emergency lowering and stop
- secured against overloading
- a counter registers number of lifts

## Molift - designed for life

At times with increasing demand for efficiency in the healthcare sector and a growing focus on patient needs, it is easy to neglect the needs of the carer. The need to give better help and caring avoiding heavy lifting situations, avoiding putting your own back at risk, without being completely exhausted after work and still have some surplus energy when the workday is over.

This is the insight that drives us at Molift. The company which was started 20 years ago by a man who through his own experience saw the need for lifting and moving patients in an effective and comfortable way – for both patient and carer.

We have since then delivered products that compliment the natural movement of the body, that is both simple and intuitive to use. Products designed to give the patient a better life in addition to providing the carer with real support and optimum work enjoyment.

This is the true meaning of; Molift – designed for life
