Cut-out for Combination Systems

To minimize the deflection of the traverse rail in combination systems on the spot where the cut-out is made for safety lock, it has been decided to change the length of the cut-out from 310 mm. to 270 mm.

The short cut-out is 120 mm

To achieve the strongest installation, we recommend you to turn the trolley as shown.

It affects the following item numbers:

Maxi 121xx-2/3 white 121xx1-2/3

Jumbo 1219x-2/3 white 1219x1-2/3
